🌐 salmanahmad-web.github.io/Portfolio | 📍 Bahawalpur, Pakistan

SUMMARY

Full-Stack Web Developer with experience in Shopify Liquid theme development and Laravel/PHP backend systems. Skilled in building responsive, production-ready e-commerce platforms — from custom storefronts to full admin dashboards — and deploying them on live VPS environments.

WORK EXPERIENCE

Frontend & Shopify Developer — E-Comkix, Bahawalpur

May 2025 – Present

- Built and deployed a Laravel/MySQL e-commerce platform on a production VPS, including server setup and database migrations.
- Developed custom Shopify themes using Liquid templating, custom sections, and metafields for client stores.
- Built responsive layouts and PHP/Laravel API endpoints, translating Figma designs into production UI.

PROJECTS

Elegia Intimates — eligia.ecomkix.com

Full-stack Laravel e-commerce platform for a fashion brand with product management, order handling, and an admin panel. Deployed on a production VPS.

Maison — maison.ecomkix.com

PHP/MySQL e-commerce store built from scratch with cart, checkout, customer authentication, and an admin dashboard. Deployed on Hostinger.

Hardware Systems — salman-ahmadd.myshopify.com

Shopify theme built from a Figma design using Liquid templating, custom sections, and JavaScript interactions.

SKILLS

Frontend: HTML5, CSS3, JavaScript, Bootstrap, Responsive UI

Backend: PHP, Laravel, REST API, GraphQL
