SALMAN AHMAD

FULL-STACK WEB & SHOPIFY DEVELOPER

Bahawalpur, Pakistan | +92 306 7388012 | salman.ahma553@gmail.com
salmanahmad-web.github.io/Portfolio

PROFESSIONAL SUMMARY

Full-Stack Web & Shopify Developer with 3 years of experience building e-commerce platforms. Skilled in Shopify Liquid themes, Shopify apps (Node.js, GraphQL Admin API, webhooks) and Laravel/PHP backends, with working knowledge of the MERN stack. Experienced in turning Figma designs into responsive, production-ready stores and deploying on VPS.

WORK EXPERIENCE

Full-Stack Web & Shopify Developer

[May 2024] – Present

E-Comkix | Bahawalpur, Pakistan

- Built Shopify stores for clients (Wig Party, Forte Series) using Liquid, custom sections and metafields, converting Figma designs into responsive pages.
- Developed a Shopify Order & Invoicing app (Node.js, GraphQL Admin API, webhooks) with one-click PDF invoice generation.
- Built and deployed Laravel/MySQL e-commerce platforms on a production VPS, including server setup and database migrations.
- Developed Laravel backend features and REST API endpoints as part of the E-Comkix development team.

PROJECTS

Wig Party

wigparty.com

Shopify store built from Figma designs using Liquid, custom sections, and responsive layouts.

Forte Series

forteseries.com

Shopify store built with Liquid and custom sections.

Elegia Intimates

eligia.ecomkix.com

Full-stack Laravel e-commerce platform for a fashion brand with product management, order handling, and an admin panel. Deployed on a production VPS.

Maison

maison.ecomkix.com

PHP/MySQL e-commerce store built from scratch with cart, checkout, customer authentication, and an admin dashboard. Deployed on Hostinger.

Ironclad Roofing

ironclad.ecomkix.com

React + Vite marketing website for a roofing business, built with React Router and custom CSS — including a responsive navbar, hero section, quote request form, and results showcase.

Shopify Order & Invoicing App

Custom Shopify app built with Node.js and the GraphQL Admin API, featuring webhook integration, a recent-orders dashboard, and one-click PDF invoice generation using PDFKit.

Hardware Systems

salman-ahmadd.myshopify.com

Shopify theme built from a Figma design using Liquid templating, custom sections, and JavaScript interactions.

TECHNICAL SKILLS

FRONTEND	BACKEND	DATABASE	PLATFORMS
